01 — COLOUR

#0D0C08	#F2EFD8	8% cream	18% cream
Near-black	**Warm cream**	**Subtle surface**	**Active surface**
Base background	All type + elements	Cards, hover states	Pressed / selected

Intent: Two colours only — no gold, no gradient, no third accent. The logo uses exactly this palette; the site extends it, never decorates it. Contrast is the brand.

02 — TYPOGRAPHY

Become the name they all know.

Display — DM Sans 600, -0.03em tracking, 42px+

We build personal brands for founders, executives, and creators who mean business.

Subheading — DM Sans 500, -0.01em tracking, 20px

Every decision we make is built around one goal: making you impossible to ignore in your industry.

Body — DM Sans 400, 65% opacity, 15px, 1.7 line-height

01 — SECTION LABEL / EYEBROW TEXT

Label — DM Mono, 10px, +0.2em, ALL CAPS, 40% opacity

Intent: DM Sans mirrors the logo's geometric confidence. Mono labels create editorial hierarchy — the same device magazines use. No serifs: the logo has none, the site won't either.

03 — BUTTONS & UI ELEMENTS

Book a Discovery Call | View Our Work | Learn More

Intent: Pill shape pulled directly from the logo's rounded bar forms. One filled CTA at a time — never two equal-weight buttons competing. Ghost variant for low-priority actions only.

04 — LAYOUT MOTIFS

Vertical labels

SERVICES

Section identifiers run vertically, pulled from the logo's sideways wordmark

Ruled grid lines

Thin horizontal rules structure sections — editorial, not corporate

Upward chevron

Scroll cue / list marker / CTA

The logo's arrow motif repeats as a signature element throughout

Generous whitespace

BREATHE

Sections have ample vertical padding — space signals premium, not empty

05 — MOTION

DIRECTION

↑ Upward reveal

Elements rise into view — never fade from sides. Mirrors the brand name.

EASING

cubic-bezier(.16,1,.3,1)

Fast in, slow out. Confident, not playful.

DURATION

600–900ms

Slow enough to feel deliberate. Never bouncy.

STAGGER

80ms per element

Cascade reveals within sections. One orchestrated moment per scroll.

06 — WHAT WE NEVER DO

- **No gradients.** The logo has none. Gradients signal uncertainty — we don't need decoration.
- **No stock photos.** Real faces or no faces. Anything else reads as generic.
- **No third colour.** If it's not #0D0C08 or #F2EFD8, it doesn't exist on this site.
- **No bouncy animations.** Every motion is slow and deliberate. Nothing springs.
- **No centred body copy.** Headlines can centre. Body text always left-aligns.
- **No two filled CTAs on screen at once.** One action is always primary. Always.
